July 25, 1994

Dear Rogelio,

Please find enclosed a copy of our Business Plan dated July 15, 1994 and a copy of a technical paper entitled "A High Specific Energy Output Free Piston Engine-Generator (HISEN-FPEG) for Hybrid Electric Vehicles and Electric Utility Power Generation". I hope these are help to you in understanding our technology and business. As I have mentioned in the past, we are pursuing parties interested in working with us in developing this technology and would like to work with you on this. We are currently working on getting our pre-prototype model running. Thank you again for your help and interest in Galileo Research.

Sincerely,

Kenneth A. Galitello, Jr.
President
